You are about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type

This product is a debt instrument in bearer form issued under German law.

Term

The product has a fixed term and - subject to an early redemption - will be redeemed on the Final Payment Date.

Objectives

The objective of this product is to give you certain rights pursuant to terms and conditions specified in advance. The product is repaid early on an Early Payment Date if the Reference Price on an Observation Date reaches or exceeds the Early Redemption Level. In this case you receive the respective Early Redemption Amount on the relevant Early Payment Date.

If the product is not repaid early, the following redemption options exist in relation to the product:

- (i) If the Reference Price on the Final Observation Date does not fall short of the Barrier, you receive the Maximum Amount on the Final Payment Date.
- (ii) If the Reference Price on the Final Observation Date falls short of the Barrier, you receive the Underlying in the quantity expressed by the Ratio on the Final Payment Date. The Underlying is calculated in a currency other than the Specified Currency. In order to balance out any exchange rate losses or gains, the Ratio corresponds to the quotient of the Nominal Amount and the Strike adjusted by the FX Exchange Rate on the FX Observation Date. If the Ratio leads to a fraction of the Underlying, you receive a Supplemental Cash Amount that corresponds to the fraction of the Underlying multiplied by the Reference Price on the Final Observation Date, instead of the fraction of the Underlying. The calculation of the Supplemental Cash Amount shall reflect the FX Exchange Rate on the FX Observation Date.

You suffer a loss if the Redemption Amount or, as the case may be, the sum of the value of the Underlyings delivered on the Final Payment Date and the Supplemental Cash Amount is below the product's purchase price.

You waive the right of dividends arising from the Underlying and have no other claims arising from the Underlying (e.g. voting rights).

The Issuer is entitled to terminate the product with immediate effect upon the occurrence of an extraordinary event. An extraordinary event is, for example, a change in law or the termination of the listing of the Underlying on the Relevant Exchange where it is not possible to specify a replacement exchange, or the cessation of the determination and publication of the FX Exchange Rate where no suitable Replacement Exchange Rate is available. In this case the Settlement Amount may also, in certain circumstances, be significantly lower than the purchase price. Even a total loss may occur. In addition, you bear the risk of termination at what is, for you, an unfavourable time, and of only being able to reinvest the Settlement Amount to less favourable conditions.

Intended retail investor

The product is intended for retail investors who pursue the objective of general formation of wealth/optimisation of assets and have a short-term investment horizon. This product is a product for investors with advanced knowledge of and/or experience with financial products. The investor is able to bear losses (up to the complete loss of the capital invested) and places no emphasis on capital protection.

2. What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that you will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium high level. Poor market conditions are very unlikely to impact our capacity to pay you.

In the case of the physical delivery of the Underlying price losses may arise even after the Final Observation Date until the Underlying is credited to your securities account. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:	Until the product is called or matures; This may be different in each scenario and is indicated in the table.	
Example Investment:	50,000 PLN	
Scenarios	If you cash in at call or maturity	
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress scenario (product ends on 04.06.2024)	What you might get back after costs	23,494 PLN
	Percentage return (non-annualised)	-53%
Unfavourable scenario (product ends on 04.06.2024)	What you might get back after costs	43,975 PLN
	Percentage return (non-annualised)	-12.1%
Moderate scenario (product ends on 04.06.2024)	What you might get back after costs	49,290 PLN
	Percentage return (non-annualised)	-1.4%
Favourable scenario (product ends on 04.06.2024)	What you might get back after costs	55,227 PLN
	Percentage return (non-annualised)	10.5%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. The scenarios shown represent possible outcomes calculated on the basis of simulations.

3. What happens if UniCredit Bank GmbH is unable to pay out?

You are exposed to the risk of the Issuer being unable to meet its obligations in relation to the product, for example in case of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures (bail-in risk). Such an order by a resolution authority may, in case of a crisis affecting the Issuer, also be adopted in the run-up to insolvency proceedings. The resolution authority has extensive powers to intervene here. Amongst other things, it may reduce investors' claims to zero, may terminate the product or convert it into shares in the Issuer and suspend investors' rights. A total loss of the capital invested may occur. The product is not covered by any deposit protection scheme. The obligations under the Product constitute direct, unconditional, senior-preferred and unsecured obligations of the Issuer and rank pari passu with all other unsecured, unsubordinated, senior preferred obligations of the Issuer.

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. The term of this product was uncertain as it might terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here. We have assumed:

- a performance of the product that is consistent with each holding period shown.
- 50,000 PLN is invested

	If the product is called at the first possible date	If the product reaches maturity
Total costs	Not applicable.	249 PLN
Cost impact*	Not applicable.	0.5%

*This illustrates the effect of costs over a holding period of less than one year. This percentage shall be calculated considering the aggregated cost in the period divided by the investment amount and cannot be directly compared to the cost impact figures provided for other products.

Composition of costs

One-off costs upon entry or exit		If you cash in on 04.06.2024 (maturity)
Entry costs	These costs are already included in the price you pay.	249 PLN
Exit costs	These costs are already included in the price you get and only apply if you exit before maturity. Exit costs do not apply if a early redemption takes place or you keep the product until maturity.	249 PLN

5. How long should I hold it and can I take money out early?

Recommended holding period: 04.06.2024 (maturity)

The aim of the product is to give you the rights described above under "1. What is this product?" provided the product is held until maturity. The only way of taking your money out early is to sell the product off-exchange. Should you sell the product before the end of the recommended holding period, you may receive less (and in some circumstances substantially less) than you would otherwise have received. In extraordinary market situations or in case of technical disruptions, the purchase or sale of the product may be rendered temporarily more difficult or impossible.

6. How can I complain?

Complaints about the person advising on or selling the product may be addressed directly to that person via the relevant webpage. Complaints about the product or about the conduct of the Issuer of the product may be made in writing (e.g. by letter or email) to UniCredit Bank GmbH at the following address: HypoVereinsbank - Member of UniCredit, UniCredit Bank GmbH, Beschwerdemanagement PPV9BM, 80311 Munich, E-mail address: Kundendialog@unicredit.de, website: www.hvb.de/beschwerdemanagement

7. Other relevant information

The Prospectus, including any supplements thereto, and the Final Terms are legally required to be published on the Issuer's website. (www.onemarkets.pl; the Prospectus and the supplements under the tab "Legal Notes / Base Prospectuses"; the Final Terms after entering the relevant ISIN or WKN in the search field and then under "Downloads") For more detailed information, particularly on the structure and the risks associated with investment in the product, you should read these documents.
